1. Maisha Israt Munny	ID:180201037
2. Khandakar Faisal Rashid Shahriar	ID:180201040
3. A . A Sakib	ID:180201043

Level: 3 Term: II

Department of CSE, 8th Batch.

Project Supervisor:

Md. Al-Hasan

Assistant Professor

Department of CSE

Bangladesh Army University of Science and Technology

Introduction:

Tourism management system is used to book a tour from anywhere in the country by a single dynamic website which will help the user to know all about the places and tour details in a single website. The admin can add packages to the website from a certain travel agents and hotels by create a tour page. Then the users can sign in and book each package, they can be confirmed by the admin in their manage booking page. The user can see the confirmation in their booking page. It is a dynamic website for tourism business. It allows the user of the system access all the details such as location, events, etc.

Objective:

- ☐ Traveling will be much easier.
- ☐ Service providers will be able to provide better services through this website.
- ☐ People will be able to easily choose the sights package and its journey will be colorful.
- ☐ Using this website will save people time.

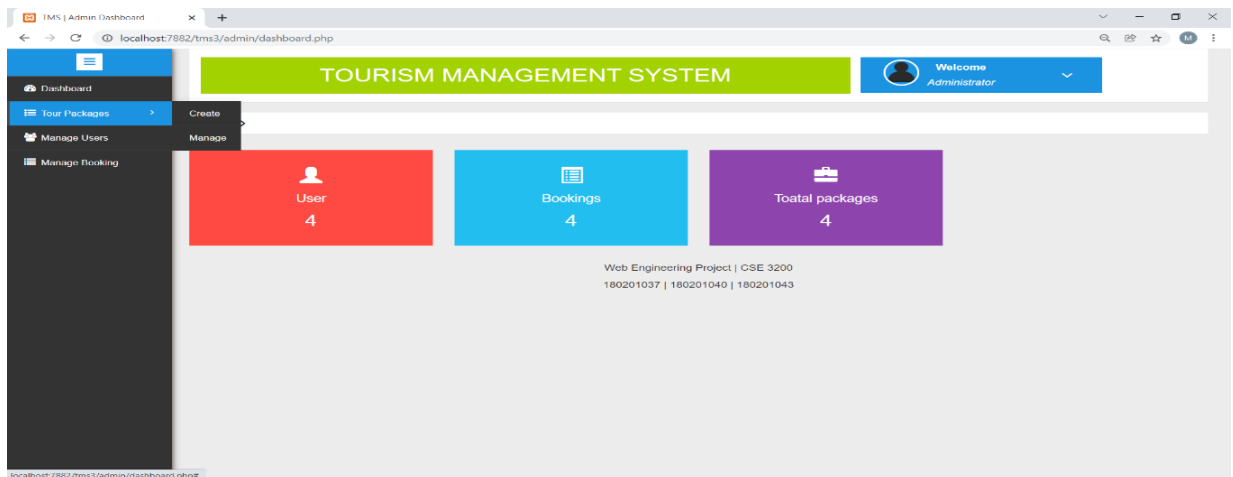

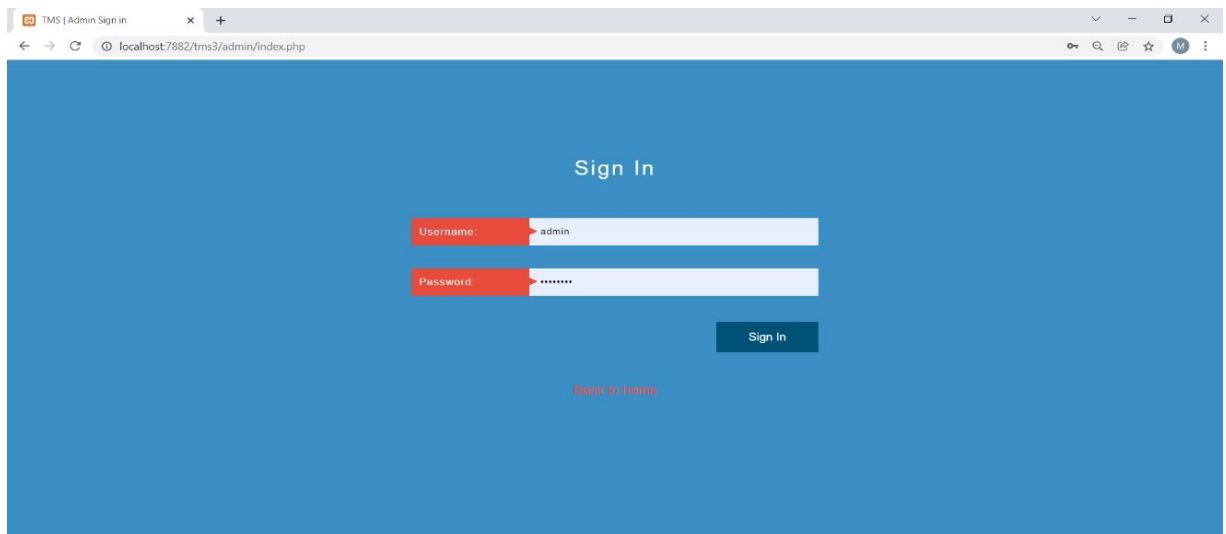

Feature Description:

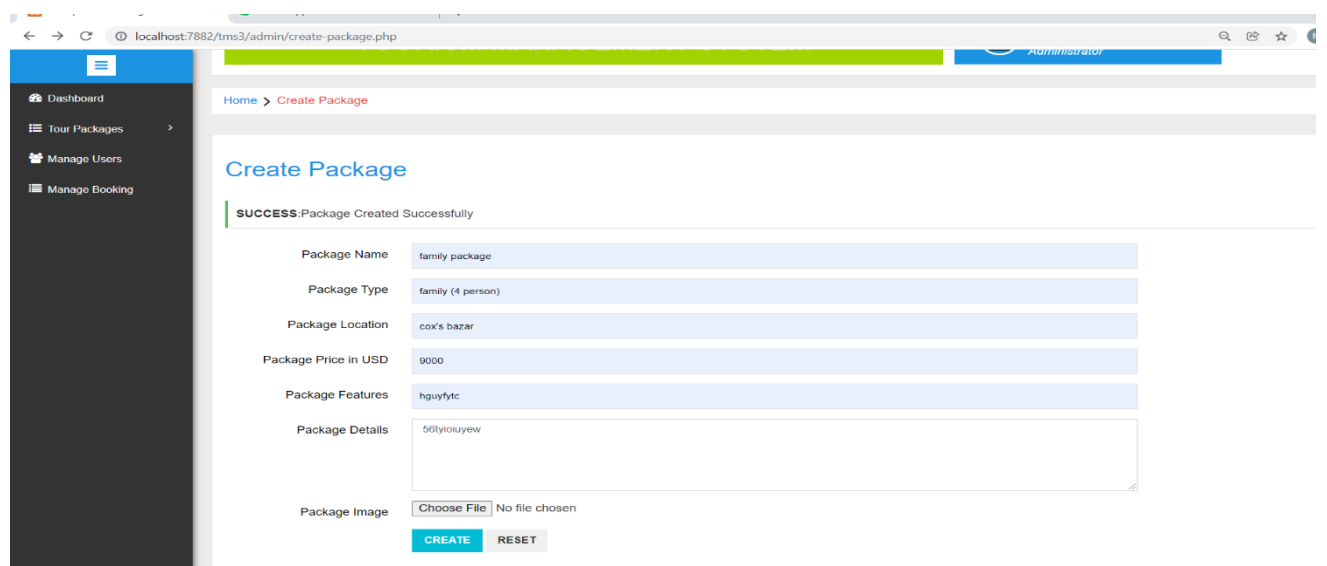

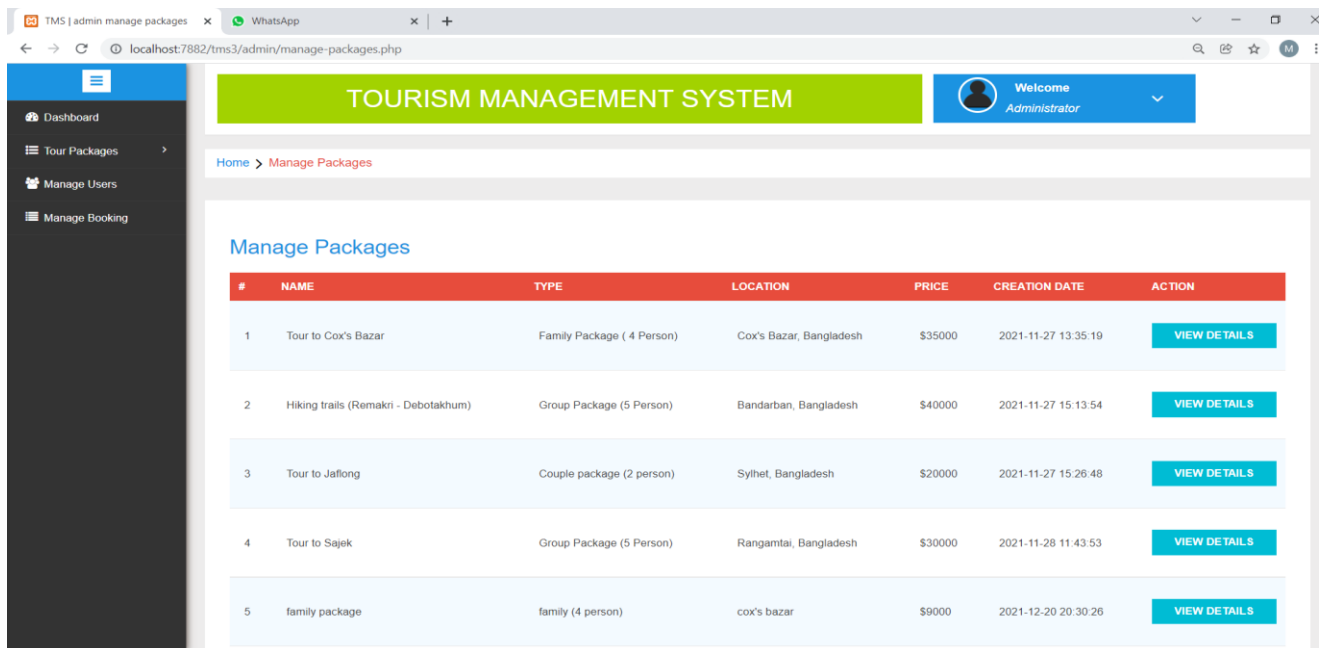

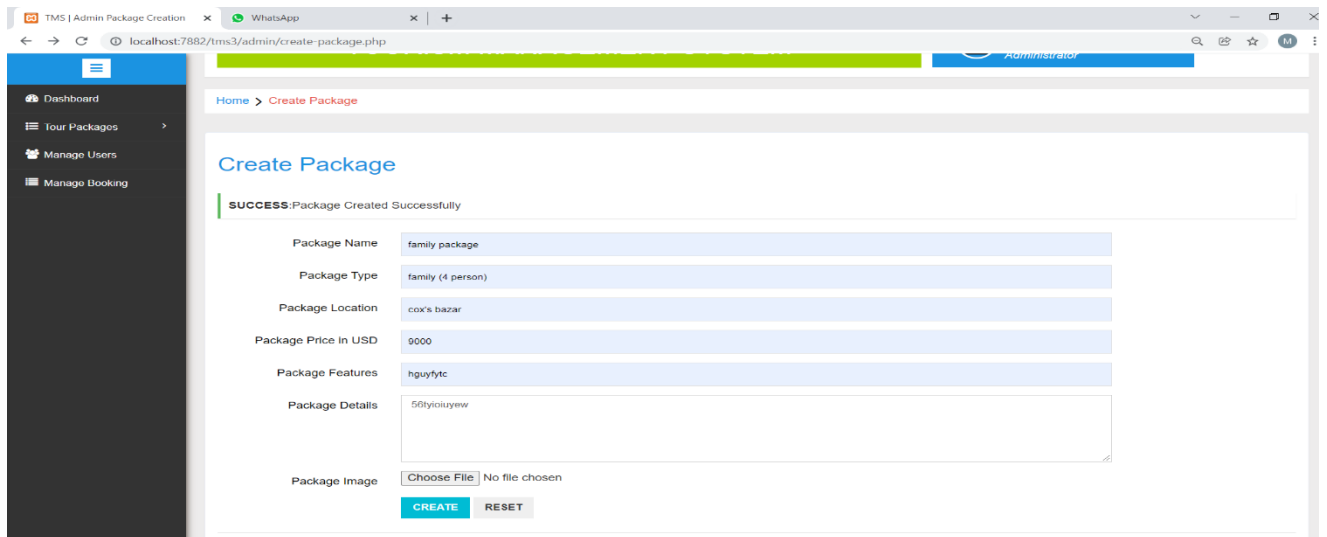

1)Admin

2)Users

Admin

- Admin can create Package
- Manage packages (Update)
- Manage Users
- Manage Booking
- Change Password
- Admin Dashboard

Users

- User can register yourself.
- User can log in with valid email and password.
- Tour Booking
- Manage Booking
- Change Password

The screenshot shows a web browser window with the URL `localhost/tms3/index.php`. The page features a dark blue header with 'Admin Login' and 'Sign Up Sign In' links. A green navigation bar contains 'Home', 'About', and 'Tour Package' links. The background is a scenic image of a cable car. A white modal box titled 'Create your account' is centered on the screen. It contains four input fields: 'Full Name', 'Mobile number', 'Email id', and 'Password'. Below these fields is a green button labeled 'CREATE ACCOUNT'.

The screenshot shows the same web browser window as above. A white modal box titled 'Signin with your account' is centered on the screen. It contains two input fields: 'Enter your Email' and 'Password'. Below these fields is a green button labeled 'SIGNIN'. The background and header elements are consistent with the previous screenshot.

Admin Authentication

This module is mainly based on admin. System will check the admin user name and password for authentication. After the verification for authorization the admin can be able to precede the process. All works are done under his control.

User Registration

This module covers the details about the registration of users which they can be register by itself by adding data like name, password, email id and further details. After registration they can be sign in by their username and password.

Package Creation

The admin can create packages by creating package page which the type, price, details, place details all the travel tour package details can be added here. Which it will be showed in user homepage.

Package Booking

In this module maintain the booking of travel packages by the user by selecting a various packages with date and certain comments.

Booking Confirmation

Booking confirmation is the process of confirming the booked packages by the admin that is booked by the user with date and comment. Also admin can manage the booking by cancelling .

Tools & Technology:

- 1)Webpage Designing- CSS, JS
- 2) Database- MySQL
- 3) Language- PHP
- 4)Markup Language- HTML
- 5)Text Editor – Sublime Text 3
